Reviews:

* The A5 Coupe and Cabriolet are Audi's contributions to the nation's Highway Beautification Program. If that appeals to you, and in the bargain you get a terrific all-around driving experience conducted in sumptuous luxury, then this is your ride. Source: KBB.com

* Classy styling; confident handling; uptown interior; frugal fuel economy. Source: Edmunds

* In 2014, the Audi A5 Coupe continues to turn heads. Its halogen, automatic headlights, aluminum doorsill inlays and panoramic tilting sunroof are standout features. It also has fancier attributes such as heated windshield nozzles, power-adjusted heated exterior side mirrors and the always sharp Singleframe grille. The interior design of the A5 focuses on the driving experience as much as feel. The instrument panel is angled toward the driver, with ergonomically designed controls and a leather-wrapped multifunction sport steering wheel with tilt, telescopic and manual adjustment falling naturally to hand. All occupants enjoy the benefits of plush leather seating surfaces and three-zone automatic climate control. This coupe also boasts eight-way power front seats, four-way power lumbar adjustments for the driver, and split folding rear seatbacks. The often-imitated Audi 2.0-liter TFSI four-cylinder engine delivers power and torque smoothly over a broad range of engine speeds through direct fuel injection, intercooled turbocharging and the Audi valvelift system. Audi quattro all-wheel drive system adjusts the power continuously between the front and rear axles, delivering superior traction in practically all driving conditions. A suite of available technologies has made the A5 a true champion of progress. Audi connect with Google Earth imagery and Wi-Fi connectivity for up to eight passenger devices allows multiple ways to stay connected. You can also access information and navigate entirely with your voice in just a few commands. Audi Concert Radio featuring ten speakers, a single CD player with mp3 playback capability and iPod integration can create the impression of a soundstage, and noise compensation technology helps maintain a constant volume. The A5 is also incredibly safe as it is equipped with driver and front passenger airbags, front thorax side airbags, knee and head curtains in addition to lower anchors and tethers...
